

ESG policy Statement

"Every resource counts" is the core spirit of ECOVE, and integrated the concept of sustainability into the company culture through the operation of a circular economy. Our goal is to make "ESG the core competitiveness and DNA of the company." We achieve this through a strategy "align ECOVE's core competencies with the realization of UN's SDGs and materiality issues." ECOVE promotes ESG through three aspects, which are "Management and Governance," "Social Participation," and "Environmental Protection," committing to strengthen organizational structure, assume our duties as a corporate citizen, and optimizing resource recycling efficiency, realize the vision of sustainable resource recycling.

Strengthening Organizational Structure

Steady growth and sustainable development are the basic requirements for performing ESG. Without them, no enterprise is capable of promoting social welfare and environmental protection. For this reason, besides legal compliance, we will continue to develop an effective internal control system, maintain information security, implement risk management, ensure accessibility and transparency in information disclosure, and uphold business self-discipline. At the same time, ECOVE provides employees with steady career development, shareholders with stable profits, and clients with satisfactory service quality.

Assuming Our Duties as a Corporate Citizen

ECOVE is committed to nurturing environmental talents and helping to enhance professional knowledge.

ECOVE complies with relevant labor laws and regulations, commits to uphold and respect internationally recognized principle of basic labor rights protection, equal rights and employee basic rights protection. ECOVE also provides employees diverse communication channels and safe and health work environment, achieving the vision of Diversity, Equality and Inclusion (DEI). We are also committed to promoting environmental education while maintaining good neighborly relations with the community and doing our best to care for and promote social welfare.

Realizing the Vision of Sustainable Resource Cycling

With a focus on sustainable net-zero goals, ECOVE has been committed to long-term resource recycle and renewable energy and green investment and operation services. From the perspective of circular economy thinking and environmental friendliness, we actively cooperate with government environmental policies to provide various low-pollution, low-carbon emissions and high-energy-efficiency resource recycling services and the development of renewable energy. To achieve a win-win situation for ECOVE, business partners, stakeholders, and the social environment, ECOVE will do its utmost to maintain a sustainable ecological environment and biodiversity.
